grounding (6)		
11	What risks does Microsoft identify regarding its dependence on cloud infrastructure and data centers?	Our datacenters depend on the availability of permitted and buildable land, predictable energy, networking supplies, and servers, including graphics processing units and other components.; There are limited suppliers for certain device and datacenter components.; The investments we are making in cloud and AI infrastructure and devices will continue to increase our operating costs and may decrease our operating margins.
12	What does NVIDIA say about the risks from U.S. export controls?	Export controls could disrupt our supply chain and distribution channels, negatively impacting our ability to serve demand, including in markets outside China and for our gaming products.; Reduced demand due to export controls could also lead to excess inventory or cause us to incur related supply charges.
13	How could tariffs and trade restrictions affect Apple's business?	Restrictions on international trade, such as tariffs and other controls on imports or exports of goods, technology or data, can materially adversely affect the Company’s business and supply chain.; Beginning in the second quarter of 2025, new tariffs were announced on imports to the U.S.
14	What risks does Microsoft see in developing and deploying AI?	AI algorithms or training methodologies may be flawed.; Content generated by AI systems may be offensive, illegal, inaccurate, or otherwise harmful.
15	Why did Apple's products gross margin percentage change in fiscal 2025?	Products gross margin percentage decreased during 2025 compared to 2024 primarily due to a different mix of products and tariff costs, partially offset by other favorable costs.
16	How fast did AWS sales grow in 2025, and what drove the growth?	AWS sales increased 20% in 2025, compared to the prior year. The sales growth primarily reflects increased customer usage, partially offset by pricing changes primarily driven by long-term customer contracts.
